

Program:

Friday - Workshop I

14:00-14:45 h	Preparation of the patient and sedation
14:45-15:30 h	Technique of acquisition
15:30-16:15 h	X-ray findings and scintigraphy of the neck
16:15-16:30 h	Coffee break
16:30-17:15 h	The head and the temporomandibular joint in scintigraphy and CT
17:15-18:00 h	2D rigid image fusion
18:30 h	Get together at "Park Hotel Ahrensburg"

Saturday - Workshop II

09:00-09:45 h	Scintigraphy of the distal limbs (front and hind)
09:45-10:30 h	The proximal front limb (Carpal joint / Shoulder)
10:30-10:45 h	Coffee break
10:45-11:30 h	The hind limb – hock and stifle
11:30-12:15 h	High suspensory desmitis – Comparison of objective and subjective evaluation
12:15-12:45 h	Lunch break
12:45-13:30 h	Cases with hip, pelvis and SI-joint problems
13:30-14:15 h	Scintigraphy of the back, correlation between clinical, x-ray and scintigraphy findings
14:15-15:00 h	What can scintigraphy do besides bonescan?
15:00-15:30 h	Various possibilities of image evaluation: subjective vs. semiobjective vs. objective methods (neck & back)
15:30-15:45 h	Coffee break
15:45-16:30 h	Comparison of scintigraphy / MRI / CT; can one replace the other?
16:30-17:00 h	Questionable or mysterious findings, artefacts and misinterpretations
17:00-17:30 h	Comparison of findings between race- and showhorses
17:30-18:00 h	Other lessons learned; is scintigraphy still alive?
